

EVPS DATA PROCESSING ADDENDUM

This Data Processing Addendum (“**DPA**”) supplements the eVPS Terms of Service available at <https://evps.host/terms-of-service>, which includes further documents such as our Privacy Policy and Acceptable User Policy, as updated from time to time between Customer and eVPS, or other agreement between Customer and eVPS governing Customer’s use of the Services (the “**Agreement**”). This DPA is an agreement between you and the entity you represent (“**Customer**”, “**you**” or “**your**”) and eVPS and the eVPS Contracting Party or eVPS Contracting Parties (as applicable) under the Agreement (together “**eVPS**”). Unless otherwise defined in this DPA or in the Agreement, all capitalized terms used in this DPA will have the meanings given to them in Section 17 of this DPA.

1. **Data Processing.**

- 1.1 **Scope and Roles.** This DPA applies when Customer Data is processed by eVPS. In this context, eVPS will act as processor to Customer, who can act either as controller or processor of Customer Data.
- 1.2 **Customer Controls.** Customer can use the Service Controls to assist it with its obligations under Applicable Data Protection Law, including its obligations to respond to requests from data subjects. Taking into account the nature of the processing, Customer agrees that it is unlikely that eVPS would become aware that Customer Data transferred under the Standard Contractual Clauses is inaccurate or outdated. Nonetheless, if eVPS becomes aware that Customer Data transferred under the Standard Contractual Clauses is inaccurate or outdated, it will inform Customer without undue delay. eVPS will cooperate with Customer to erase or rectify inaccurate or outdated Customer Data transferred under the Standard Contractual Clauses by providing the Service Controls that Customer can use to erase or rectify Customer Data.
- 1.3 **Details of Data Processing.**
 - 1.3.1 **Subject matter.** The subject matter of the data processing under this DPA is Customer Data.
 - 1.3.2 **Duration.** As between eVPS and Customer, the duration of the data processing under this DPA is determined by Customer.
 - 1.3.3 **Purpose.** The purpose of the data processing under this DPA is the provision of the Services initiated by Customer from time to time.
 - 1.3.4 **Nature of the processing.** Compute, storage and such other Services as described in the Documentation and initiated by Customer from time to time.
 - 1.3.5 **Type of Customer Data.** Customer Data uploaded to the Services under Customer’s eVPS accounts.
 - 1.3.6 **Categories of data subjects.** The data subjects could include Customer’s customers, employees, suppliers and End Users.
- 1.4 **Compliance with eVPS.** Each party will comply with all eVPS, rules and regulations applicable to it and binding on it in the performance of this DPA, including Applicable Data Protection Law.

2. **Customer Instructions.** The parties agree that this DPA and the Agreement (including Customer providing instructions via configuration tools such as the eVPS management console and APIs made available by eVPS for the Services) constitute Customer's documented instructions regarding eVPS's processing of Customer Data ("**Documented Instructions**"). eVPS will process Customer Data only in accordance with Documented Instructions (which if Customer is acting as a processor, could be based on the instructions of its controllers). Additional instructions outside the scope of the Documented Instructions (if any) require prior written agreement between eVPS and Customer, including agreement on any additional fees payable by Customer to eVPS for carrying out such instructions. Customer is entitled to terminate this DPA and the Agreement if eVPS declines to follow instructions requested by Customer that are outside the scope of, or changed from, those given or agreed to be given in this DPA. Taking into account the nature of the processing, Customer agrees that it is unlikely eVPS can form an opinion on whether Documented Instructions infringe Applicable Data Protection Law. If eVPS forms such an opinion, it will immediately inform Customer, in which case, Customer is entitled to withdraw or modify its Documented Instructions.
3. **Confidentiality of Customer Data.** eVPS will not access or use, or disclose to any third party, any Customer Data, except, in each case, as necessary to maintain or provide the Services, or as necessary to comply with the law or a valid and binding order of a governmental body (such as a subpoena or court order). If a governmental body sends eVPS a demand for Customer Data, eVPS will attempt to redirect the governmental body to request that data directly from Customer. As part of this effort, eVPS may provide Customer's basic contact information to the governmental body. If compelled to disclose Customer Data to a governmental body, then eVPS will give Customer reasonable notice of the demand to allow Customer to seek a protective order or other appropriate remedy unless eVPS is legally prohibited from doing so.
4. **Confidentiality Obligations of eVPS Personnel.** eVPS restricts its personnel from processing Customer Data without authorization by eVPS as described in the Security Standards. eVPS imposes appropriate contractual obligations upon its personnel, including relevant obligations regarding confidentiality, data protection and data security.

5. Security of Data Processing

- 5.1 eVPS has implemented and will maintain the technical and organizational measures for the eVPS Network as described in the Security Standards and this Section. In particular, eVPS has implemented and will maintain the following technical and organizational measures:
- (a) security of the eVPS Network as set out in Section 1.1 of the Security Standards;
 - (b) physical security of the facilities as set out in Section 1.2 of the Security Standards;
 - (c) measures to control access rights for authorized personnel to the eVPS Network as set out in Section 1.3 of the Security Standards; and
 - (d) processes for regularly testing, assessing and evaluating the effectiveness of the technical and organizational measures implemented by eVPS as described in Section 2 of the Security Standards.
- 5.2 Customer can elect to implement technical and organizational measures to protect Customer Data. Such technical and organizational measures include the following which can be obtained by Customer from eVPS as described in the Documentation, or directly from a third-party supplier:
- (a) pseudonymization and encryption to ensure an appropriate level of security;
 - (b) measures to ensure the ongoing confidentiality, integrity, availability and resilience of the processing systems and services that are operated by Customer
 - (c) measures to allow Customer to backup and archive appropriately in order to restore availability and access to Customer Data in a timely manner in the event of a physical or technical incident; and
 - (d) processes for regularly testing, assessing and evaluating the effectiveness of the technical and organizational measures implemented by Customer.

6. Sub-processing.

6.1 **Authorized Sub-processors.** Customer provides general authorization to eVPS's use of sub-processors to provide processing activities on Customer Data on behalf of Customer ("Sub-processors") in accordance with this Section.

6.2 **Sub-processor Obligations.** Where eVPS authorizes a Sub-processor as described in Section 6.1:

- (i) eVPS will restrict the Sub-processor's access to Customer Data only to what is necessary to provide or maintain the Services in accordance with the Documentation, and eVPS will prohibit the Sub-processor from accessing Customer Data for any other purpose;
- (ii) eVPS will enter into a written agreement with the Sub-processor and, to the extent that the Sub-processor performs the same data processing services provided by eVPS under this DPA, eVPS will impose on the Sub-processor the same contractual obligations that eVPS has under this DPA; and
- (iii) eVPS will remain responsible for its compliance with the obligations of this DPA and for any acts or omissions of the Sub-processor that cause eVPS to breach any of eVPS's obligations under this DPA.

7. eVPS Assistance with Data Subject Requests. Taking into account the nature of the processing, the Service Controls are the technical and organizational measures by which eVPS will assist Customer in fulfilling Customer's obligations to respond to data subjects' requests under Applicable Data Protection Law. If a data subject makes a request to eVPS, eVPS will promptly forward such request to Customer once eVPS has identified that the request is from a data subject for whom Customer is responsible. Customer authorizes on its behalf, and on behalf of its controllers when Customer is acting as a processor, eVPS to respond to any data subject who makes a request to eVPS, to confirm that eVPS has forwarded the request to Customer. The parties agree that Customer's use of the Service Controls and eVPS forwarding data subjects' requests to Customer in accordance with this Section, represent the scope and extent of Customer's required assistance.

8. Optional Security Features. eVPS makes available many Service Controls that Customer can elect to use. Customer is responsible for (a) implementing the measures described in Section 5.2, as appropriate, (b) properly configuring the Services, (c) using the Service Controls to allow Customer to restore the availability and access to Customer Data in a timely manner in the event of a physical or technical incident (for example backups and routine archiving of Customer Data), and taking such steps as Customer considers adequate to maintain appropriate security, protection, and deletion of Customer Data, which includes use of encryption technology to protect Customer Data from unauthorized access and measures to control access rights to Customer Data.

9. Security Incident Notification.

- 9.1 **Security Incident.** eVPS will (a) notify Customer of a Security Incident without undue delay after becoming aware of the Security Incident, and (b) take appropriate measures to address the Security Incident, including measures to mitigate any adverse effects resulting from the Security Incident.
- 9.2 **eVPS Assistance.** To enable Customer to notify a Security Incident to supervisory authorities or data subjects (as applicable), eVPS will cooperate with and assist Customer by including in the notification under Section 9.1(a) such information about the Security Incident as eVPS is able to disclose to Customer, taking into account the nature of the processing, the information available to eVPS, and any restrictions on disclosing the information, such as confidentiality. Taking into account the nature of the processing, Customer agrees that it is best able to determine the likely consequences of a Security Incident.
- 9.3 **Unsuccessful Security Incidents.** Customer agrees that:
- (i) an unsuccessful Security Incident will not be subject to this Section 9. An unsuccessful Security Incident is one that results in no unauthorized access to Customer Data or to any of eVPS's equipment or facilities storing Customer Data, and could include, without limitation, pings and other broadcast attacks on firewalls or edge servers, port scans, unsuccessful log-on attempts, denial of service attacks, packet sniffing (or other unauthorized access to traffic data that does not result in access beyond headers) or similar incidents; and
 - (ii) eVPS's obligation to report or respond to a Security Incident under this Section 9 is not and will not be construed as an acknowledgement by eVPS of any fault or liability of eVPS with respect to the Security Incident.
- 9.4 **Communication.** Notification(s) of Security Incidents, if any, will be delivered to one or more of Customer's administrators by any means eVPS selects, including via email. It is Customer's sole responsibility to ensure Customer's administrators maintain accurate contact information on the eVPS management console and secure transmission at all times

10. Transfers of Personal Data.

- 10.1 **Regions.** Customer cannot specify the location(s) where Customer Data will be processed within the eVPS Network, including Regions in the United States and the EEA. eVPS may transfer Customer Data inside eVPS's Network, or as necessary to comply with the law or valid and binding order of a governmental body.
- 10.2 **Application of Standard Contractual Clauses.** Subject to Section 12.3, the Standard Contractual Clauses will only apply to Customer Data subject to the GDPR that is transferred, either directly or via onward transfer, to any Third Country (each a "**Data Transfer**").
 - 10.2.1 When Customer is acting as a controller, the Controller-to-Processor Clauses will apply to a Data Transfer.
 - 10.2.2 When Customer is acting as a processor, the Processor-to-Processor Clauses will apply to a Data Transfer. Taking into account the nature of the processing, Customer agrees that it is unlikely that eVPS will know the identity of Customer's controllers because eVPS has no direct relationship with Customer's controllers and therefore, Customer will fulfil eVPS's obligations to Customer's controllers under the Processor-to-Processor Clauses.
- 10.3 **Alternative Transfer Mechanism.** The Standard Contractual Clauses will not apply to a Data Transfer if eVPS has adopted Binding Corporate Rules for Processors or an alternative recognized compliance standard for lawful Data Transfers.

11. **Termination of the DPA.** This DPA will continue in force until the termination of the Agreement (the “**Termination Date**”).
12. **Return or Deletion of Customer Data.** At any time up to the Termination Date, and for 90 days following the Termination Date, subject to the terms and conditions of the Agreement, eVPS will return or delete Customer Data when Customer uses the Service Controls to request such return or deletion. No later than the end of this 90-day period, Customer will close all eVPS accounts containing Customer Data.
13. **Duties to Inform.** Where Customer Data becomes subject to confiscation during bankruptcy or insolvency proceedings, or similar measures by third parties while being processed by eVPS, eVPS will inform Customer without undue delay. eVPS will, without undue delay, notify all relevant parties in such action (for example, creditors, bankruptcy trustee) that any Customer Data subjected to those proceedings is Customer’s property and area of responsibility and that Customer Data is at Customer’s sole disposition.
14. **Entire Agreement; Conflict.** This DPA incorporates the Standard Contractual Clauses by reference. Except as amended by this DPA, the Agreement will remain in full force and effect. If there is a conflict between the Agreement and this DPA, the terms of this DPA will control, except that the Service Terms will control over this DPA. Nothing in this document varies or modifies the Standard Contractual Clauses.
15. **Definitions.** Unless otherwise defined in the Agreement, all capitalized terms used in this DPA will have the meanings given to them below:

“**API**” means an application program interface.

“**Applicable Data Protection Law**” means all eVPS and regulations applicable to and binding on the processing of Customer Data by a party, including, as applicable, the GDPR.

“**eVPS Network**” means the servers, networking equipment, and host software systems (for example, virtual firewalls) that are within eVPS’s control and are used to provide the Services.

“**Binding Corporate Rules**” has the meaning given to it in the GDPR.

“**Controller**” has the meaning given to it in the GDPR.

“**Customer Data**” means the Personal Data that is uploaded to the Services under Customer’s eVPS accounts.

“**EEA**” means the European Economic Area.

“**GDPR**” means Regulation 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

“**Personal Data**” means personal data, personal information, personally identifiable information or other equivalent term (each as defined in Applicable Data Protection Law).

“**Processing**” has the meaning given to it in the GDPR and “process”, “processes” and “processed” will be interpreted accordingly.

“**Processor**” has the meaning given to it in the GDPR

“Region” has the meaning given to it in Section 10.1 of this DPA.

“Security Incident” means a breach of eVPS’s security leading to the accidental or unlawful destruction, loss, alteration, unauthorized disclosure of, or access to, Customer Data.

“Security Standards” means the security standards attached to this DPA as Annex 1.

“Service Controls” means the controls, including security features and functionalities, that the Services provide.

“Third Country” means a country outside the EEA not recognized by the European Commission as providing an adequate level of protection for personal data (as described in the GDPR).

Annex 1

Security Standards

Capitalized terms not otherwise defined in this document have the meanings assigned to them in the Agreement.

1 Information Security Program. eVPS will maintain an information security program designed to (a) enable Customer to secure Customer Data against accidental or unlawful loss, access, or disclosure, (b) identify reasonably foreseeable risks to the security and availability of the eVPS Network, and (c) minimize physical and logical security risks to the eVPS Network, including through regular risk assessment and testing. eVPS will designate one or more employees to coordinate and be accountable for the information security program.

eVPS's information security program will include the following measures:

1.1 Logical Security.

A. Access Controls. eVPS will make the eVPS Network accessible only to authorized personnel, and only as necessary to maintain and provide the Services. eVPS will maintain access controls and policies to manage authorizations for access to the eVPS Network from each network connection and user, including through the use of firewalls or functionally equivalent technology and authentication controls. eVPS will maintain access controls designed to (i) restrict unauthorized access to data, and (ii) segregate each customer's data from other customers' data.

B. Restricted User Access. eVPS will (i) provision and restrict user access to the eVPS Network in accordance with least privilege principles based on personnel job functions, (ii) require review and approval prior to provisioning access to the eVPS Network above least privileged principles, including administrator accounts; (iii) require at least quarterly review of eVPS Network access privileges and, where necessary, revoke eVPS Network access privileges in a timely manner, and (iv) require two- factor authentication for access to the eVPS Network from remote locations.

C. Vulnerability Assessments. eVPS will perform regular external vulnerability assessments and penetration testing of the eVPS Network, and will investigate identified issues and track them to resolution in a timely manner.

D. Application Security. Before publicly launching new Services or significant new features of Services, eVPS will perform application security reviews designed to identify, mitigate and remediate security risks.

E. Change Management. eVPS will maintain controls designed to log, authorize, test, approve and document changes to existing eVPS Network resources, and will document change details within its change management or deployment tools. eVPS will test changes according to its change management standards prior to migration to production. eVPS will maintain processes designed to detect unauthorized changes to the eVPS Network and track identified issues to a resolution.

F. Data Integrity. eVPS will maintain controls designed to provide data integrity during transmission, storage and processing within the eVPS Network. eVPS will provide Customer the ability to delete Customer Data from the eVPS Network.

G. Business Continuity and Disaster Recovery. eVPS will maintain a formal risk management program designed to support the continuity of its critical business functions (“**Business Continuity Program**”). The Business Continuity Program includes processes and procedures for identification of, response to, and recovery from, events that could prevent or materially impair eVPS’s provision of the Services (a “**BCP Event**”). The Business Continuity Program includes a three-phased approach that eVPS will follow to manage BCP Events:

- (i) **Activation & Notification Phase.** As eVPS identifies issues likely to result in a BCP Event, eVPS will escalate, validate and investigate those issues. During this phase, eVPS will analyze the root cause of the BCP Event.
- (ii) **Recovery Phase.** eVPS assigns responsibility to the appropriate teams to take steps to restore normal system functionality or stabilize the affected Services.
- (iii) **Reconstitution Phase.** eVPS leadership reviews actions taken and confirms that the recovery effort is complete and the affected portions of the Services and eVPS Network have been restored. Following such confirmation, eVPS conducts a post-mortem analysis of the BCP Event

H. Storage Media Decommissioning. eVPS will maintain a media decommissioning process that is conducted prior to final disposal of storage media used to store Customer Data. Prior to final disposal, storage media that was used to store Customer Data will be degaussed, erased, purged, physically destroyed, or otherwise sanitized in accordance with industry standard practices designed to ensure that the Customer Data cannot be retrieved from the applicable type of storage media.

1.2 Physical Security.

A. Access Controls. eVPS will (i) implement and maintain physical safeguards designed to prevent unauthorized physical access, damage, or interference to the eVPS Network, (ii) use appropriate control devices to restrict physical access to the eVPS Network to only authorized personnel who have a legitimate business need for such access, (iii) monitor physical access to the eVPS Network using intrusion detection systems designed to monitor, detect, and alert appropriate personnel of security incidents, (iv) log and regularly audit physical access to the eVPS Network, and (v) perform periodic reviews to validate adherence with these standards.

B. Availability. eVPS will (i) implement redundant systems for the eVPS Network designed to minimize the effect of a malfunction on the eVPS Network, (ii) design the eVPS Network to anticipate and tolerate hardware failures, and (iii) implement automated processes designed to move customer data traffic away from the affected area in the case of hardware failure.

1.3 eVPS Employees.

A. Employee Security Training. eVPS will implement and maintain employee security training programs regarding eVPS information security requirements. The security awareness training programs will be reviewed and updated at least annually.

B. Background Checks. Where permitted by law, and to the extent available from applicable governmental authorities, eVPS will require that each employee undergo a background investigation

that is reasonable and appropriate for that employee's position and level of access to the eVPS Network.

2 Continued Evaluation. eVPS will conduct periodic reviews of the information security program for the eVPS Network. eVPS will update or alter its information security program as necessary to respond to new security risks and to take advantage of new technologies.
